Francesco Mintrone

• CURRICULUM VITAE | EN

Dr. Francesco Mintrone began his career as a dental technician, developing an early and profound understanding of prosthetic craftsmanship before specializing as a ceramist in fixed prosthodontics. He later graduated with honors in Dentistry from the University Modena, Italy, combining technical excellence with advanced clinical expertise.

He further enhanced his education through extensive postgraduate training in prosthodontics, implant surgery, and periodontology, building a comprehensive and interdisciplinary approach to modern dental rehabilitation.

An active member of the European Academy of Esthetic Dentistry (EAED), Dr. Mintrone was awarded the Master Clinician in Implant Dentistry at the gIDE Institute in both 2011 and 2012. He subsequently joined the institute as a Faculty Member in the Implant Master Program.

He has published several articles in international scientific journals and is widely recognized as an international lecturer on topics including digital dentistry, artificial intelligence in dentistry, implant biology, and prosthodontics.

Dr. Mintrone's clinical practice is primarily focused on esthetic rehabilitation and complex prosthetic treatment involving both implants and natural dentition in his private practices in Modena, Italy.
